INSTRUCTIONS

Applicants seeking authority to construct a new commercial, noncommercial or international broadcast station, applicants seeking authority to obtain assignment of the construction permit or license of such a station, and applicants seeking authority to acquire control of an entity holding such construction permit or license are required to afford equal employment opportunity to all qualified persons and to refrain from discrimination in employment and related benefits on the basis of race, color, religion, national origin or sex. See Section 73.2080 of the Commission's Rules. Pursuant to these requirements, an applicant who proposes to employ five or more full-time employees must establish a program designed to assure equal employment opportunity for women and minority groups (that is, Blacks not of Hispanic origin, Asians or Pacific Islanders, American Indians or Alaskan Natives and Hispanics). This is submitted to the Commission as the Model EEO Program. If minority group representation in the available labor force is less than five percent (in the aggregate), a program for minority group members is not required. In such cases, a statement so indicating must be set forth in the EEO model program. However, a program must be filed for women since they comprise a significant percentage of virtually all area labor forces. If an applicant proposes to employ fewer than five full-time employees, no EEO program for women or minorities need be filed.

Guidelines for a Model EEO Program and a Model EEO Report

GUIDELINES TO THE MODEL EEO PROGRAM

The model EEO program adopted by the Commission for construction permit applicants, assignees and transferees contains five sections designed to assist the applicant in establishing an effective EEO program for its station. The specific elements which should be addressed are as follows:

I. GENERAL POLICY

The first section of the program should contain a statement by the applicant that it will afford equal employment opportunity in all personnel actions without regard to race, color, religion, national origin or sex, and that it has adopted an EEO program which is designed to fully utilize the skills of qualified minorities and women in the relevant available labor force.

II. RESPONSIBILITY FOR IMPLEMENTATION

This section calls for the name (if known) and title of the official who will be designated by the applicant to have responsibility for implementing the station's program.

III. POLICY DISSEMINATION

The purpose of this section is to disclose the manner in which the station's EEO policy will be communicated to employees and prospective employees. The applicant's program should indicate whether it: (a) intends to utilize an employment application form which contains a notice informing job applicants that discrimination is prohibited and that persons who believe that they have been discriminated against may notify appropriate governmental agencies; (b) will post a notice which informs job applicants and employees that the applicant is an equal opportunity employer and that they may notify appropriate governmental authorities if they believe that they have been discriminated against; and (c) will seek the cooperation of labor unions, if represented at the station, in the implementation of its EEO program and in the inclusion of nondiscrimination provisions in union contracts. The applicant should also set forth any other methods it proposes to utilize in conveying its EEO policy (e.g., orientation materials, on-air announcements, station newsletter) to employees and prospective employees.

IV. RECRUITMENT

The applicant should specify the recruitment sources and other techniques it proposes to use to attract qualified minority and female job applicants. Not all of the categories of recruitment sources need be utilized. The purpose of the listing is to assist the applicant in developing specialized referral sources to establish a pool of qualified minorities and women who can be contacted as job opportunities occur. Sources which subsequently prove to be nonproductive should not be relied on and new sources should be sought.

V. TRAINING

Training programs are not mandatory. Each applicant is expected to decide, depending upon its own individual situation, whether a training program is feasible and would assist in its effort to increase the available pool of qualified minority and female applicants. Additionally, the applicant may set forth any other assistance it proposes to give to students, schools or colleges which is designed to be of benefit to minorities and women interested in entering the broadcasting field. The beneficiary of such assistance should be listed, as well as the form of assistance, such as contributions to scholarships, participation in work study programs, and the like.

MODEL EQUAL EMPLOYMENT OPPORTUNITY PROGRAM

I. GENERAL POLICY

It will be our policy to provide employment opportunity to all qualified individuals without regard to their race, color, religion, national origin or sex in all personnel actions including recruitment, evaluation, selection, promotion, compensation, training and termination.

It will also be our policy to promote the realization of equal employment opportunity through a positive, continuing program of specific practices designed to ensure the full realization of equal employment opportunity without regard to race, color, religion, national origin or sex.

To make this policy effective, and to ensure conformance with the Rules and Regulations of the Federal Communications Commission, we have adopted an Equal Employment Opportunity Program which includes the following elements:

II. RESPONSIBILITY FOR IMPLEMENTATION

(Name/Title) Rita Reyna Brent, owner will be responsible for the administration and implementation of our Equal Employment Opportunity Program. It will also be the responsibility of all persons making employment decisions with respect to the recruitment, evaluation, selection, promotion, compensation, training and termination of employees to ensure that our policy and program is adhered to and that no person is discriminated against in employment because of race, color, religion, national origin or sex.

III. POLICY DISSEMINATION

To assure that all members of the staff are cognizant of our equal employment opportunity policy and their individual responsibilities in carrying out this policy, the following communication efforts will be made:

- ☒ The station's employment application form will contain a notice informing prospective employees that discrimination because of race, color, religion, national origin or sex is prohibited and that they may notify the appropriate local, State or Federal agency if they believe they have been the victims of discrimination.
- ☒ Appropriate notices will be posted informing applicants and employees that the station is an Equal Opportunity Employer and of their right to notify an appropriate local, State or Federal agency if they believe they have been the victims of discrimination.
- ☒ We will seek the cooperation of unions, if represented at the station, to help implement our EEO program and all union contracts will contain a nondiscrimination clause.
- ☒ Other (specify)

Periodic meetings will be held with all staff members involved in the recruiting, hiring, training and promoting of station employees, to educate and remind

IV. RECRUITMENT them of this policy and to emphasize the importance of executing each aspect of this policy.

To ensure nondiscrimination in relation to minorities and women, and to foster their full consideration whenever job vacancies occur, we propose to utilize the following recruitment procedures:

- ☒ We will contact a variety of minority and women's organizations to encourage the referral of qualified minority and women applicants whenever job vacancies occur. Examples of organizations we intend to contact are:

N.A.A.C.P.- Louisville Chapter
 American Women in Radio and Television- Louisville chapter
 Indiana Broadcasters Association
 Louisville Urban League

- ☒ In addition to the organizations noted above, which specialize in minority and women candidates, we will deal only with employment services, including State employment agencies, which refer job candidates without regard to their race, color, religion, national origin or sex. Examples of these employment referral services are:

State of Indiana Department of Employment and Training Services
 State of Kentucky human Resources Cabinet Employment Services

- ☒ When we recruit prospective employees from educational institutions such recruitment efforts will include area schools and colleges with minority and women enrollments. Educational institutions to be contacted for recruitment purposes are:

Univ. of Indiana-southeast campus, University of Louisville, Jefferson Community College, Ivy Tech

- ☒ When we place employment advertisements with media some of such advertisements will be placed in media which have significant circulation or viewership or are of particular interest to minorities and women. Examples of media to be utilized are:

The Louisville Defender, Storer Cable System (BET channel 31)
 New Albany Tribune, The Courier journal (Indiana Edition)

- ☒ We will encourage employees to refer qualified minority and women candidates for existing and future job openings.

V. TRAINING

- ☐ Station resources and/or needs will be such that we will be unable or do not choose to institute programs for upgrading the skills of employees.
- ☐ We will provide on-the-job training to upgrade the skills of employees.
- ☒ We will provide assistance to students, schools, or colleges in programs designed to enable qualified minorities and women to compete in the broadcast employment market on an equitable basis:

School or Other Beneficiary	Proposed Form of Assistance
<u>Univ of Indiana-Southeast</u>	<u>internships</u>
<u>Univ. of Louisville</u>	<u>internships</u>
<u>Jefferson Community College</u>	<u>internships</u>

- ☒ Other (specify) We will provide informal on-the-job training to upgrade and improve the skills of employees.

The staff, consisting variously of attorneys, analysts, engineers and applications examiners, will use the information to determine whether the application should be granted, denied, dismissed, or designated for hearing. If all the information is not provided, the application may be returned without action having been taken upon it or its processing may be delayed while a request is made to provide the missing information. Accordingly, every effort should be made to provide all necessary information. Your response is required to obtain the requested authority.

Public reporting burden for this collection of information is estimated to vary from 71 hours 45 minutes to 301 hours 30 minutes with an average of 118 hours 28 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, can be sent to the Federal Communications Commission, Office of Managing Director, Washington, D.C. 20554, and to the Office of Management and Budget Paperwork Reduction Project (3060-0027), Washington, D.C. 20503.

20. Environmental Statement/See 47 C.F.R. Section 1.1301 et seq.)

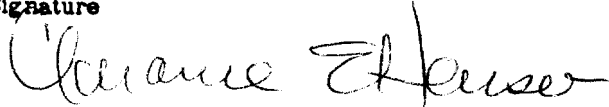

Would a Commission grant of this application come within Section 1.1307 of the FCC Rules, such that it may have a significant environmental impact? ☐ Yes ☒ No

If you answer Yes, submit as an Exhibit an Environmental Assessment required by Section 1.1311.

Exhibit No.
DNA

If No, explain briefly why not. None of the circumstances contained in Section 1.1307 which would trigger a major action are present. The proposed facility is in compliance with the ANSI guidelines for human exposure to RF radiation. Appropriate safeguards will be taken to protect workers from excessive radiation while working on the tower. Strobe lighting is not proposed.

I certify that I have prepared this Section of this application on behalf of the applicant, and that after such preparation, I have examined the foregoing and found it to be accurate and true to the best of my knowledge and belief.

ENGINEERING STATEMENT

This engineering statement and the accompanying exhibits have been prepared for Ms. Rita Reyna Brent in support of her application for permission to build a new FM radio station to serve the city of New Albany, Indiana. Channel 234 has been assigned to that city as a Class A channel. Because this allotment resulted from a petition filed prior to October 2, 1989, applicants for this proposed station were allowed under the provisions of Section 73.213(c)(1) to file for this facility at an effective radiated power of 3.0 kW. In order to avoid short spacing with other proposed or existing facilities this applicant filed under these provisions.

PROPOSED SITE AND ALLOCATION STUDY:

The location of the proposed site is shown in Exhibits E-2 and E-3. The transmitter and antenna will be located at this site. The antenna will be side mounted on the tower. No other transmitting antenna will be located on the tower.

The geographical coordinates of the proposed FM antenna are:

North Latitude 38 17' 30"
West Longitude 85 54' 19"

Exhibit E-4 is an FM separation study for Channel 234 prepared in accordance to Section 73.207. This study shows there will be no short spacing to any other existing station, construction permit or pending application. Consideration has been given to the 10.8 MHz separation.

Among other factors, the transmitter location proposed for use was chosen in order to maximize coverage to the city of license while minimizing interference. There are no proposed or authorized FM or TV transmitters or any nonbroadcast (except citizens band or amateur) radio stations within 60 meters of the proposed antenna.

Using Section 73.318, the 115 dBu (562 mV/m) blanketing contour was determined to be $0.394 \times$ (the square root of 1.608) = 0.50 kilometers. There are no established commercial or government receiving stations, cable head-end facilities or densely populated areas within 0.50 kilometers of the proposed transmitter location.

PROPOSED SITE AND ALLOCATION STUDY (CONTINUED):

No receiver-induced intermodulation interference is expected to be produced between other stations and the proposed facility. As a licensee, the applicant will be responsible to undertake any remedial steps necessary to eliminate any objectionable interference it produces (including that caused by receiver-induced or other types of modulation).

EFFECTIVE RADIATED POWER:

As indicated above, the applicant is filing for this facility under provisions 73.213(c)(1) as an equivalent of 3.0 kW at a height above average terrain of 100 meters. Since the actual height of the proposed center of radiation is 135 meters above average terrain, the effective radiated power in both the horizontal and vertical planes has been reduced to 1.608 kW.

OTHER BROADCAST FACILITIES:

There are no AM, FM or Television broadcast stations within two miles of the site.

NGDC TERRAIN DATA:

An average terrain evaluation study complying with the FCC's policy has been conducted using the NGDC 30 second elevation point database. These data have been employed along with the proposed ERP and the applicable F(50,50) FM Curves of the Commission's Rules for determination of the proposed contour locations shown in Exhibit E-3.

SERVICE CONTOURS AND POPULATION:

Populations within the proposed 1.0 MV/M(60dbu) contours were determined using the 1990 Census data, resulting in a population of 692,248 (the population count would have been 728,814 had the 1980 census been used). The area within the 1.0 MV/M contour was determined by numerical integration. Area and population data are indicated in response to paragraph 17 of FCC Form 301. The 3.16 MV/M contour covers the entire city of New Albany, Indiana.
